EDUCATION

The University of Texas at Austin

B.S. Electrical & Computer Engineering

May 2026

RELEVANT COURSEWORK

- Algorithms, Computer Security, Software Design, Software Testing, Embedded Systems Design

TECHNICAL SKILLS

- **Languages:** C/C++, Bash, SQL, Python, JavaScript, Java
- **Frameworks/Technologies:** React, Flask, REST APIs, MongoDB
- **Developer Tools:** Git, Docker, Kubernetes, Linux
- **Engineering:** Static Analysis, Machine Learning, Agile Development

PROJECTS

Senior Engineering Design – Austin, TX

September 2024 - May 2025

Team Member – Clang Taint Analysis Evaluation

- Developed a reproducible benchmarking workflow for Clang Static Analyzer's taint analysis across 10+ open-source C/C++ codebases, automating repository builds and collecting structured diagnostics for evaluation
- Identified and validated security-sensitive data flows in OpenSSL, PostgreSQL, SQLite and FIniteStateEntropy, including tainted environment variables reaching popen()/system() sinks and a CERT STRO2-C violation
- Tuned analyzer configuration including inter-procedural depth, function inlining, and loop depth; manually classified findings to evaluate false positives, false negatives, runtime, and analyzer limitations

Software Design Laboratory – Austin, TX

Fall 2025

Team Member – Full-Stack Web Application

- Developed a full-stack hardware resource management platform using React, Flask, and MongoDB, implementing user authentication, project management, and hardware checkout/check-in workflows
- Built client-server functionality for persistent user, project, and hardware data using React Router, Axios and MongoDB/PyMongo, with real-time hardware availability updates
- Implemented production-oriented deployment and development workflows using GitHub actions, ESLint, GitHub pages and MongoDB Atlas

Phishing URL Detection Using Machine Learning

Fall 2025

Independent

- Engineered 16 lexical, structural, and domain-based URL features and trained a Random Forest classifier on 450,176 URLs, achieving 99.73% accuracy and 99.14% recall for phishing URLs
- Evaluated model performance using precision, recall, F1, ROC-AUC, and false-positive rate; achieved 0.995 phishing F1, 0.9994 AUC, and 0.09% false-positive rate on the stratified test set
- Performed feature-importance analysis identifying HTTPS presence (59.26%) and subdomain count (24.78%) as the strongest predictors, while achieving 0.21 ms per-URL inference time

EXPERIENCE

William C. Powers Jr. – University of Texas at Austin

September 2024 – 2026 **Student Facility Manager**

- Supervised facility operations, enforced safety procedures, and resolved customer issues while coordinating staff and maintaining event readiness
- Managed day-to-day operational responsibilities in a high-traffic university facility, balancing competing priorities and responding to time-sensitive issues

Chick-Fil-A – Houston, Texas

May 2023 – January 2024 **Cashier/Front of the House Member**

- Greeted customers in a friendly and courteous manner, taking orders accurately and efficiently
- Ensured accuracy of customer orders by double-checking order tickets before completing transactions
